Through my education as a software engineer and experience as a project manager in a high pressure industry, I understand how to execute multiple projects and manage people while meeting expectations in a time-sensitive environment. I am most energized working alongside passionate and driven individuals who work synergistic-ally to deliver an aggregate that is stronger than its components.

**Skills:**

HTML 5 | CSS3 | Bootstrap | React | JavaScript | Node.js | Ruby | Rails | ExpressJS | MongoDB | MongooseJS | Heroku | MERN | SQL | SASS | Redux | FirebaseDB |

**Software Development Projects**

(The Redux Clone of Monkey Island)

- TRDCMI is a conversation clone from a 1997 computer game called The Curse of Monkey Island. This app utilizes Redux to generate a multiple choice conversation with an NPC.
- Utilized Git control during the production of the application with frequent commits until deployment.
- Tested API routes using Postman to ensure functionality during production and deployed through Heroku
- Technologies used: Node, Express, HTML5, CSS3, AJAX, JavaScript, React, Redux

(Morementum)

- Morementum is a full-stack clone of a popular Google Chrome extension that operates as a todo app utilizing Ruby and React. This was a group project in my General Assembly immersive.
- Utilized Git and group branching during the production of the application with frequent commits until deployment.
- Tested API routes using Postman to ensure functionality during production and deployed through Heroku
- Technologies: HTML5, CSS3, AJAX, JavaScript, React, Ruby, Rails, GeoLocation API, OpenWeatherMap API

(Marvel Assemble)

- Marvel Assemble is a full-stack MERN application that allows a user to search for a Marvel hero utilizing Marvel's API.
- Utilized Git control during the production of the application with frequent commits until deployment.
- Tested API routes using Postman to ensure functionality during production and deployed through Heroku
- Technologies used: Node, Express, MongoDB, HTML5, CSS3, AJAX, JavaScript, React, Procreate for design

(V.O. GO)

- V.O. Go is a single page web application that allows a user to enter and upload an embedded Soundcloud link into a database along with corresponding information so voice artists can record and save their recordings.
- Utilized Git control during the production of the application with frequent commits until deployment.
- Tested API routes using Postman to ensure functionality during production and deployed through Heroku
- Technologies used: Node, Express, MongoDB, HTML5, CSS3, AJAX, JavaScript, Procreate and Gimp for design

**Professional Experience:**

EPS America LLC - *Senior Project Manager*

Oct 2016- Jun 2020

- Coordinate logistics and organize infrastructure for multiple large scale tours, events, and festivals hosting up to 100,000 attendees
- Worked with Excel as a digital database to keep active inventories and determine logistical efficiencies
- Work remotely and travel across North America to liaise and evaluate client needs
- Run product and loss reports to evaluate business strategy and growth
- Maintain healthy working relationships with internal and external colleagues and partners
- Promoted from PM

*Lead Supervisor*

April 2014- Oct 2016

- Oversaw crew of 20-30 labors to build and maintain large infrastructure projects under tight time frames
- Maintained customer relations face to face during high pressure situations
- Worked symbiotically with multiple production crews on-site to build and maintain concerts and festival infrastructure under heavy time constraints

**Education:**

General Assembly Remote - General Assembly Software Engineering Immersive Certificate

Oct 2020 - Jan 2021

Tunxis Community College, Farmington, CT - *Associate's Degree in General Studies*

**Volunteer History:**

Guest Speaker

2017

Tunxis Community College, Bristol CT

- Guest speaker for First Year Experience, a required class for all students. Lectured on social emotional intelligence reflected in written communication

Podcast Host

2015-Current

Smodcast Internet Radio

- Guest podcast host on the Nooner Show on director Kevin Smith's podcast network
